

Why am I pro-life?

Imagine baby after baby being murdered from abortion. That isn't just an image in your head, it is true. The beauty of life and adoption is destroyed by abortion. I'm pro-life because abortion is the same as murder , adoption helps families grow, and life is a wonderful gift.

Abortion of an innocent baby is murder. The fifth Commandment says, "You shall not kill." It shows that killing someone is against what God wants for us. Science proves that life starts at conception. The baby didn't do anything to deliberately hurt you, so don't kill him or her. Babies just want to live their life God gave them and do what he wanted us to complete on earth. The wonderful little baby could just make you happy. God created people, and we shouldn't take that life away.

Adoption helps families grow. Babies are a gift to everyone, to the mother of the baby or the parents that adopted the baby. For some couples that are not able to have kids of their own, adoption is a wonderful way for them to find a new little baby to love for the rest of their lives. The babies bring joy and love into their homes. When you see babies, they bring warm and loving feelings to your heart, and they make you realize that the gift of life is one in a million. God wants you to give the baby life so give him or her life by keeping the baby or putting him or her up for adoption. Through adoption, your baby can have a wonderful home and feel loved by everyone in it.

The gift of life is a wonderful gift. God gave you the chance to give the baby a wonderful life. "The Gospel Of Life, a Brief Summary" says, "Jesus shows us that life is always good." Jesus wants us to show that life is a gift to everyone, and we should honor being alive and on earth with the people we love. Babies just want to live, we shouldn't kill them. All they want to do is to see why the world is so amazing around us and to see how beautiful people can be. God wants us to value his creation of human life and to let us see how beautiful it can be. Human life is a precious gift, we shouldn't be the one taking it away.

The beauty of life and adoption is destroyed by abortion. I'm pro-life because abortion is murder, adoption helps families grow, and life is a gift. I hope you choose not to abort your child and instead realize how precious human life is.
